

Qconnect – Carwash

All-in-one payment solution for car washes!

Want to make paying in car wash applications even more user-friendly and manageable? Qconnect – Car wash makes it possible. It offers the most commonly used management functions in combination with the best Android payment terminals from leading manufacturers. The perfect balance between user-friendliness, manageability and costs.

- ✓ Direct insight into status and sales information
- ✓ Cost savings through remote management and support
- ✓ Adjustable alarms in case of malfunctions or deviations
- ✓ Save on transaction fees and additional hardware

Retrieving and modifying real-time information

Our Paydroid app has a continuous connection to our Qconnect platform. Remotely, we can retrieve information, change configurations, read logging, perform network tests, give resets and even take over the payment terminal.

Proactive notifications

Because the payment terminal provides real-time feedback, malfunctions can be quickly detected and remedied. Often even before the customers realize it.

More turnover at lower costs

Because our solution provides continuous insight into the status of your car washes, tire inflating systems and vacuum cleaners, this leads to more turnover at lower costs. Customer behavior becomes transparent, so that more turnover can be generated and any malfunctions are immediately known.

Our POS terminals

Whether you are just looking for a payment terminal for a car wash or a total solution that also includes tire inflating installations, vacuum cleaners, washing bays and coffee machines, we have one that meets all these solutions in your area.

UNLIMITED

Our payment terminals accept almost all payment cards and ask for a PIN code when necessary. They accept international and local brands via the VISA and Mastercard network and fuel cards from Extendas, Lodder, Eurotrafic, Routex, MTC, Travelcard, UTA and DKV.

NO LOCK-INS

You choose where you want to enter into your transaction processing contract. We can also arrange this for you by using the competitive offer of one of the transaction processors selected by us.

ALL-IN-ONE & CONTACTLESS ONLY

RESISTANT (IK09/IP65) & SAFE (PCI PTS v6.x)
