

# Qonnect – EV Charging

## All-in-one payment solution for charging infrastructure!

Make payments in charging applications more transparent, user-friendly and manageable? Qonnect - EV makes it possible. It ensures that your end customers can pay with trusted and secure means of payment while also complying with the applicable AFIR rules. Our platform also offers the most commonly used management functions in combination with the best Android payment terminals from leading manufacturers. The perfect balance between compliance, user-friendliness, manageability and costs.

- ✓ AFIR compliant with payment options and transparency
- ✓ Suitable for existing and new AC or DC charging infrastructure
- ✓ Multiple integrations possible; From plug & play to fully self-integration
- ✓ Linking multiple charging stations to one payment terminal
- ✓ Remotely customizable customer journeys via our Paydroid app on the payment terminal
- ✓ Remotely adjustable branding / look & feel on the payment terminal
- ✓ Real-time insight into active charging sessions, progress, configurations and alarms
- ✓ No MSP fees for transactions with a POS terminal (such as starting rates & surcharges)

### Retrieving and modifying real-time information

Our Paydroid app has a continuous connection to our Qonnect platform. Remotely, we can retrieve information, change configurations, read logging, perform network tests, give resets and even take over the payment terminal.

### Proactive notifications

Because the payment terminal provides real-time feedback, malfunctions can be quickly detected and remedied. Often even before the customers realize it.

### Get your revenue faster at lower costs

Because our solution works with the leading transaction processors, you no longer have to wait long for your turnover. This is usually paid out the next day. And all this with low transaction fees and secure VISA and Mastercard payment cards issued by leading card issuers!

## Our POS terminals

ALL-IN-ONE

CONTACTLESS ONLY

For our total offer, please visit [www.q-vend.nl/en/terminals](http://www.q-vend.nl/en/terminals)

**UNLIMITED**

Our payment terminals accept almost all payment cards and ask for a PIN code when necessary. They accept international and local brands through the VISA and Mastercard network. This makes them usable throughout Europe.

**NO LOCK-INS**

You choose where you want to enter into your transaction processing contract. We can also arrange this for you by using the competitive offer of one of the transaction processors selected by us.

**ALL-IN-ONE & CONTACTLESS ONLY**

**RESISTANT (IK09/IP65) & SAFE (PCI PTS v6.x)**

**ANDROID PAYMENT TERMINALS**

**EVA STANDARD DIMENSIONS**

**Transaction processing**

We may provide you with a transaction processing offer specific to your environment and use case through one of our partners listed below. This way you have one party that supplies your POS terminal and takes care of transaction processing. It's that easy.

**TRANSACTION PROCESSOR FREEDOM**

**COMPETITIVE RATES**

**DELIVERED IN WORKING ORDER**

**PREMIUM SUPPORT**

For all other transaction processors, check out [www.acquiris.eu/members/](http://www.acquiris.eu/members/)
