

# Announcement!

## Goodbye VALINA....

- Worldline has stopped producing the VALINA and announces its end of life;
  - As of 01/01/2028, VALINA terminals will only be repaired as long as parts are in stock.
  - As of 01/01/2030, VALINA terminals will no longer be repaired and the maintenance/RMA process will be stopped.
  - As of 01/05/2030, safety certificates in the VALINA expire and are no longer usable for making transactions and from that date VALINA terminals are End-Of-Life
- You can still order VALINA payment terminals until 31/03/2026 at Q-Vend while stocks last, but of course we prefer to advise on its successors...

## ...Hello CCV IM / Ingenico SX series!

# Q-Vend – Qonnect

Want to make payment even more user-friendly and manageable? Q-Vend - Qonnect makes it possible. It offers the possibility to realize optimal user experiences on Android payment terminals and to take the management of your solution to the next level. Combined with the best Android payment terminals from leading manufacturers, the perfect balance between user-friendliness, manageability and costs is found.

- ✓ Remotely configurable user experiences with your own branding
- ✓ Direct insight into status, sales information and stock
- ✓ Export or print revenue reports and statements
- ✓ Cost savings through remote management and support
- ✓ Adjustable alarms in case of malfunctions or deviations
- ✓ Save on transaction costs, additional hardware and subscriptions

### Real-time management

Our Paydroid app has a continuous connection to our Qonnect platform. Remotely, we can retrieve information, change configurations, read logging, perform network tests, give resets and even take over the payment terminal.

### Proactive notifications

Because the payment terminal provides real-time feedback, malfunctions can be quickly detected and remedied. Often even before the customers realize it.

### More turnover at lower costs

Doordat onze oplossing continu inzicht geeft over de status van uw oplossing leidt dat tot meer omzet tegen lagere kosten. Voorraad wordt voorspelbaar en eventuele storingen zijn direct bekend.

## Why a Q-Vend payment terminal?

### UNLIMITED

Our payment terminals accept almost all payment cards and ask for a PIN code when necessary. They accept international and local brands through the VISA and Mastercard network. This makes them usable throughout Europe.

### NO LOCK-INS

You choose where you want to enter into your transaction processing contract. We can also arrange this for you by using the competitive offer of one of our selected transaction processors.

### MULTIFUNCTIONAL

By using our Q-Vend Android app and our Qonnect platform in combination with your POS terminal, you give your end customers a better user experience, increase sales and take the management of the POS terminal to the next level.
